BunBau v6.8 Release Report
Strict Contextual Modal Partitioning & Dedicated Ingestion Workflow Architecture

---

Executive Release Metadata
- **Milestone Designation:** `v6.8`
- **Application Version:** `2.7.10`
- **Build Number:** `Build 125`
- **Architecture Version:** `v2.9.3 Strict Contextual Modal Partitioning & Dedicated Ingestion Workflow Architecture`
- **Mandatory Version Tracking Enforcement:** *"You also need to update the application version/build/architecture version for every iteration build."*
- **Regression Verification:** **101 / 101 Test Suites Passing (576 / 576 Unit Tests 100% Green)**
- **Next.js 15 Production Build:** **Compiled successfully in 7.2s — 16 / 16 Static & Dynamic Routes Verified**
- **Date:** October 12, 2026

---

1. Executive Summary

Milestone **v6.8** delivers strict contextual modal partitioning between brokerage portfolio data ingestion and tax return filing ingestion across the BunBau web application. Based on user feedback and production UI audits, having universal 3-way tabs (`PDF Upload`, `Brokerage CSV Export`, and `Screenshots`) visible simultaneously in both portfolio and tax workflows introduced user confusion regarding what file types belonged to which workspace.

With Milestone v6.8, `UploadValidationModal` cleanly scopes its tab rendering and active state by context:
- In **Portfolio Ingestion** (`context === 'portfolio'`), the `[PDF Upload (Tax Returns)]` tab is completely hidden. The user sees only `[Brokerage CSV Export]` and `[Screenshots (Vision)]`.
- In **Tax Return Ingestion** (`context === 'tax'`), the `[Brokerage CSV Export]` and `[Screenshots (Vision)]` tabs are completely hidden. The user sees only `[PDF Upload (Tax Returns)]`.

2. Comprehensive Remediation Matrix

2.1 Dedicated Portfolio Ingestion Workflow (`context === 'portfolio'`)
- **The Problem:**
  When opening the upload modal from the main portfolio navigation or dashboard (Screenshot 2), the modal presented a tab for `[PDF Upload (Tax Returns)]`. Users uploading brokerage CSVs or screenshots were confused about why tax return uploads were mixed into portfolio holdings ingestion.
- **The v6.8 Solution:**
  1. **Strictly Hidden PDF Tab:** In `UploadValidationModal.tsx`, the `tab-pdf` button is now strictly guarded by `context === 'tax'`. When in portfolio context, the PDF tab is never rendered.
  2. **Active Tab Guard:** Initial state and `useEffect` logic guarantee `activeTab` defaults to `'csv'` (or `'vision'`) and will never initialize to `'pdf'` when in portfolio context.
  3. **Dedicated Tab Set:** The user is presented solely with:
     - `[Brokerage CSV Export]` (`data-testid="tab-csv"`)
     - `[Screenshots (Vision)]` (`data-testid="tab-vision"`)

2.2 Dedicated Tax Return Ingestion Workflow (`context === 'tax'`)
- **The Problem:**
  When opening the upload modal from the Tax Expert page (Screenshot 1), the modal presented tabs for `[Brokerage CSV Export]` and `[Screenshots (Vision)]`. This led users to believe portfolio transactions could be uploaded in place of tax returns, causing confusion between 1040/540 tax filings and brokerage account records.
- **The v6.8 Solution:**
  1. **Strictly Hidden Portfolio Tabs:** When `context === 'tax'`, `tab-csv` and `tab-vision` are completely hidden.
  2. **Dedicated Tax Tab:** The modal presents solely:
     - `[PDF Upload (Tax Returns)]` (`data-testid="tab-pdf"`)
  3. **Locked Active Tab:** `activeTab` is locked to `'pdf'` whenever `context === 'tax'`.
  4. **Multi-Modal Tax Option Preserved:** Users who wish to ingest tax scans or Schedule D CSVs in Tax Expert can continue to utilize `TaxMultiUploaderModal` w

hich is specifically designed for multi-year tax filings.

3. Verification & Test Execution Results

3.1 Unit Test Coverage
```bash
$ npm test
✓ 101 passed (101 test files)
✓ 576 passed (576 tests)
Duration: 5.37s
```

All 14 Tax Expert test suites passed with 100% green status:
1. `tests/unit/tax/contextual_tab_partitioning.test.ts` (7 tests) - **NEW**
2. `tests/unit/tax/tax_data_partitioning_and_actions.test.ts` (12 tests)
3. `tests/unit/tax/universal_upload_modal.test.ts` (16 tests)
4. `tests/unit/tax/version_guard.test.ts` (4 tests)
5. `tests/unit/tax/tax_delete_phrase.test.ts` (4 tests)
6. `tests/unit/tax/pdf_multi_year_ingestion.test.ts` (4 tests)
7. `tests/unit/tax/tax_demo_mode.test.ts` (4 tests)
8. `tests/unit/tax/longitudinal_scalability.test.ts` (4 tests)
9. `tests/unit/tax/lifecycle_planning.test.ts` (5 tests)
10. `tests/unit/tax/tax_calculations.test.ts` (4 tests)
11. `tests/unit/tax/strategist_rag_coexistence.test.ts` (3 tests)
12. `tests/unit/tax/tax_rag_retrieval.test.ts` (4 tests)
13. `tests/unit/tax/tax_history_view_integration.test.ts` (2 tests)
14. `tests/unit/tax/document_viewer_virtualization.test.ts` (3 tests)

3.2 Next.js 15 Production Build Verification
```bash
$ npm run build
> bunbau@2.7.10 build
> next build

   ▲ Next.js 15.5.27
   - Environments: .env.local
